

Company Overview

CORPORATE PROFILE

QiComm is a leading independent provider of systems integration, engineering and telecommunications solutions. QiComm focuses on six primary markets:

- Telco Systems Integration
- Wireless Networks
- Carrier Services
- Managed Services
- Co-location
- Wholesale Broadband Voice

QiComm switches in excess of 500 million minutes per month including 250 million of our own wholesale & retail minutes.

QiComm has been trusted for almost two decades as the telecommunications provider of choice for some of the worlds largest Telco's, Carriers and Government Agencies.

Telco Systems Integration

QiComm's Telco Systems Integration group is a market leader in planning, designing, deploying & installing, integrating, managing and monitoring wired and wireless networks. QiComm delivers bespoke IP network solutions.

Wireless Networks

QiComm also operates a Wireless Networks business unit, which has delivered some of the most sophisticated wireless networks in Europe.

Carrier Services

Our carrier services group offers :

- Wholesale voice partition
- Voice termination
- IP Interconnects
- Wholesale services
- Next Generation Networks
- Number Translations
- Switch Services
- Least Cost Routing

Co-location and Data Centre Services

Brand new hosting facilities built to the highest industry standards and able to host up to 500 customer cabinets, fully connected to all major carrier networks and with supporting engineering services which can be tailored to specific customer requirements.

Managed Services

QiComm's Managed Services Division has invested heavily in our Telehouse and NOC in Central London. Leasing access to our suite of Managed Services is beneficial as it avoids the capital and operational expenditure of establishing your own voice network. A managed services contract from QiComm offers a low risk, fixed price solution, and enables a quick route to market.

Wholesale Voice-over-Broadband

QiComm's white-labelled Wholesale Voice-over-Broadband (VoBB) solution enables service providers to offer a complete suite of Class 5 Telephony Services. The service includes billing & reporting, hardware & software and a customer and service-provider web portal to their customers to make low cost, high quality VoIP calls.

Experience you can trust | QiComm is a leader in the telecommunications market we serve. We have considerable telecommunications experience along with the significant advantages of our comprehensive in-house technical skill set and robust relationships across the industry.

MISSION | QiComm's mission is to provide quality telecommunication services with integrity, ethical business practices and a personal touch.

REVENUE | QiComm's revenue in 2010 was GBP £ 93 million - an increase of 35% year on year.

EMPLOYEES | QiComm has more than 100 employees, with 60% engaged in engineering and technical roles.

Qicommm's UK headquarters is in Hampton Hill, South West London. Our new Data Centre is located in Docklands, London. Qicommm also has offices in India, Sri Lanka, Hong Kong, Philippines and Malaysia
