

Secure, Efficient and Flexible Co-location Services

Who We Are

Established in 1989, QiComm is a privately owned Systems Integrator with a proven track record of delivering innovative telecommunication solution worldwide. Over the past decade QiComm has efficiently provided managed services at its telehouse in the UK and in Sri Lanka.

QiComm's revenue in 2010 was £93 Million, an increase of 35% from the previous year. We were awarded the fastest growing telecommunications company in 2010's Tech Track 100 by the Sunday Times. Our growth has lead to the acquisition of a new site in docklands. This new facility has been engineered to provide a world class data centre, utilising the latest technology available in the market today.

Location & Standards

Our new Data Centre is located at City Reach, 5 Greenwich View, London. The new facility has a total of 25,000 Square feet dedicated to Co-location and disaster recovery services.

Our New Data Centre

- **Reliability**

Co-location and Data Centre Services

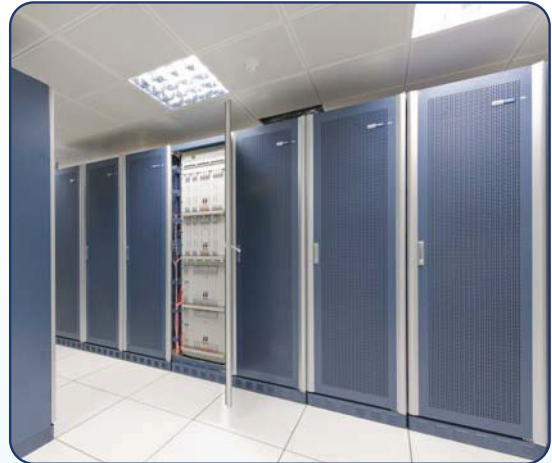

Network Operations centre (NOC)

QiComm's NOC provides complete care and flexible 24x7 support throughout the year

Power & Cooling

Standard 3KW power allocation, redundant backup power and the latest active power systems for proactive equipment protection.

QiComm have utilised a cold aisle containment philosophy for optimum handling of hot and cold air for increased efficiency

Communication

The data centre can be accessed via diverse fibre routes into the building. QiComm has deployed a dark fibre ring around the major communication hubs in London. Our superior connectivity links give customers the flexibility to decide on which communication services providers to use.

Fire Detection

VESDA Aspirating smoke detectors provide early warning that is critical in a clean room.

Backed by FM200 fire suppression equipments which is effective against Class A,B and electrical fires.

Security

Tight security clearance procedures backed by 24x7x365 manned security with an option of individual card access to each cabinet.

Telepresence Solution

QiComm has installed a global VPN platform from which customers will benefit. Utilising the latest high-definition video, real time audio and a standardised interior design. Telepresence solution offers an "in-person" meeting experience with the ease of pushing a button.
