Telco Systems Integration

The QiComm Systems Integration group has the experience you need for success. We pride ourselves on delivering complex systems integration projects on time and on budget, every time.

Our Telco Systems Integration Practice has delivered many large complex and high value systems integration projects for some of Europe's largest Telco's, Carriers and Government Agencies.

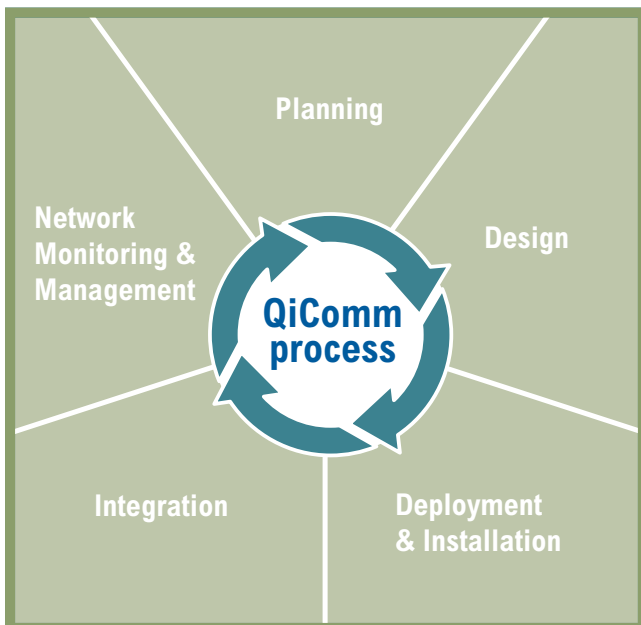

OUR SYSTEMS INTEGRATION EXPERIENCE

QiComm's Telco Systems Integration Division has the experience your project needs to ensure success. QiComm has a comprehensive resume of deploying infrastructure for Europe's largest Telcos and Carriers

THE QICOMM DEPLOYMENT PROCESS

Every Systems Integration project follows the QiComm Telco Systems Integration project methodology which is quality assured by ISO 9001:2000.

- (i) planning and consulting
- (ii) design and optimisation
- (ii) deployment
- (iv) integration
- (iv) monitoring and management

PLANNING & CONSULTING

Planning is critical to the success of large projects, and QiComm's Telco Systems Integration team is fluent in all the major project management techniques, including Prince II.

DESIGN & OPTIMISATION

QiComm provides comprehensive design services for types of large Systems Integration projects. We have considerable IP experience in house, and beyond design, we can also optimise existing network infrastructures.

DEPLOYMENT & INTEGRATION

QiComms network deployment and integration teams are professional, multi-vendor certified, highly skilled, innovative and efficient.

We encourage innovative approaches to problem solving. We understand the value of proper planning to ensure we get it right first time - every time. Our goal is to successfully deliver the project, and delight our customers

QiComm brings expertise, economies of scale and an ability to leverage local resources,

With QiComm you can expect a successful, high quality, cost-effective network launch.

MONITORING & MANAGEMENT

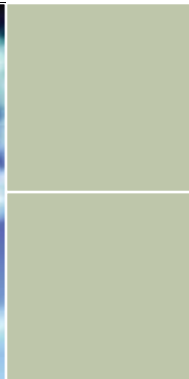

Beyond the initial deployment, QiComm can oversee all aspects of network management to keep operations at peak efficiency without the overhead associated with a fixed staff.

Our services include network operations, and maintenance, network optimisation and competitive benchmarking.

PROJECT DOCUMENTATION

QiComm provides comprehensive project documentation upon completion of each phase of your Telco Systems Integration project.

“QiComm has the people, the skills and experience to successfully deliver large complex systems integration projects”

TELECOMMUNICATIONS HARDWARE

QiComm specialises in supplying a range of leading edge products, covering a wide range of our telecommunications needs.

From Network Access, Local Area Networks, Wide Area Networks, Wireless Networks, Transmission, Edge and Core products, QiComm boasts a powerful portfolio of solid vendor relationships to provide the most comprehensive telecommunications solutions to our clients.

QiComm also supplies Added Value Service Platforms for Next Generation Networks or NGN's. These advanced services, operate behind the core infrastructure, to deliver revenue generating services to service providers.

QiComm's range consists of interactive voice response (IVR) systems, calling card platforms, pre paid billing solutions, media rich content delivery, pre paid Internet and multi-messaging systems.

NEXT GENERATION TELCOMS HARDWARE

QiComm Telco SI group can supply, configure, install and maintain market leading multi-service telecoms solutions, including Digitalk, Cirpack Thompson, Artilium, N-Soft and Veraz.

Our Managed Services group can arrange for you to lease access to any of the above multi service telecoms solutions. Please call us for more information.

CONNECTIVITY INFRASTRUCTURE

QiComm has a strong relationship with ADC and this relationship gives our customers:

- A single interface for vendor products
- A local team in the UK to meet your requirements
- Value, Inventory and Speed to Market
- Expertise in Fibre and Copper Connectivity
- Excellent Logistics Service
- Strong Pre-Sales and Technical Support

CONNECTIVITY SOLUTIONS

QiComm have provided DSL solutions to the market since 1990. QiComm deployed HDSL solutions to Network Rail & Local Authorities in the UK which delivered 2Mb/E1 services between remote sites.

London Underground Ltd had the requirement for LAN extension over it's own copper pairs and chose QiComm's IP DSLAM solution which support simultaneous voice and data over single copper pair's.

Over 10,000 DSL lines of varying bandwidths between 64k - 10Mbps have now been deployed by QiComm's clients in both the Private and Public sector.

SUPPORT CONTRACTS SERVICE LEVEL AGREEMENTS

QiComm highly trained staff provide support 24 hours a day 365 days a year. QiComm can tailor a bespoke support package with SLA's to meet your exact requirements, whether that is for telephone support, scheduled & unscheduled maintenance, onsite support, "hot swap" support or miscellaneous support requests.

From our NOC in Central London, we provide 24 x 7 network monitoring, remote management and configuration, firmware updates and so forth.

Telco Systems Integration

QiComm's Telco Systems Integration division delivers excellence in Systems Integration.

QiComm has a considerable project management, systems integration and IP networking skills making QiComm your ideal Systems Inegration partner.

CASE STUDY

T-Mobile (formerly One2One)
1992 - Present (Ongoing Supply Contract)

Systems Integration :

Supply, Install and Commission of a GSM access transmission network covering 3,000 sites within the United Kingdom.

CASE STUDY

London Underground
2001 - Present (Ongoing Support Contract)

Systems Integration :

Design, Install, Commission and Supply of an ADSL network, enabling data services over an existing voice (copper) network infrastructure.

Managed Services :

24 x 7 support of London Underground Network.

CASE STUDY

MINISTRY OF DEFENCE

UK Ministry of Defence

1993 - Present (Ongoing Support Contract)

Systems Integration

Plan - Design - Deploy - Manage MOD Private Network

Managed Services :

24 x 7 Support of Private Network

ISO 9001 : 2000 CERTIFIED AND REGISTERED

All QiComm processes are ISO 9001:2000 certified and registered. This certification is part of QiComm's commitment to provide quality services and to focus on total customer satisfaction.

EXPERIENCE YOU CAN TRUST

For almost 20 years, Carriers, Telco's and Government has trusted QiComm to deliver world class voice and data networks.
